ANALYTIC SUBJECT INDEX TO VOLUME 1

References with (L) are to Letters to the Editor.

Absorption
Dielectric, of organic liquids, W. T. Szymanowski—809
Of sound by gases, W. T. Richards—863
Of sound in N_2O_4, W. T. Richards, J. A. Reid—737

Absorption spectra
Of ethyl halides, P. C. Cross, F. Daniels—48
Of CN, G. B. Kistiakowsky, H. Gershinowitz—432; correction—885
Of NO_2 and N_2O_4, R. Schaffert—507

Acoustical properties of gases, W. T. Richards—863

Adsorption
Gibbs' adsorption isotherm, F. O. Koenig, R. C. Swain —723
Phase rule for, I. Langmuir—3

Allison effect
Formation of CH_2O from CO_2 and H_2O, J. H. Yoe, R. E. Wingard—886(L)

Allotropy
Of nitrobenzene, E. L. Lind, T. F. Young—266

Alloys
Valency electrons in binary intermetallic alloys, H. Perlitz—335

Atomic weights
Of radioactive substances, F. Western, A. E. Ruark—717

Colloidal phenomena (see also Surface phenomena)
Electrophoretic mobilities and the isoelectric point of protein-coated particles, O. Halpern—882

Critical potentials
For chemical reaction, R. H. Müller, G. C. Brous—482

Crystal nuclei
Binding energies of, H. S. Taylor, H. Eyring, A. Sherman —68

Crystal structure
Of 1,3 and 1,4 diiodobenzene, S. B. Hendricks, L. R. Maxwell, V. L. Moseley, M. E. Jefferson—549
Interatomic distances in the alkali halides, M. L. Huggins, J. E. Mayer—643
Lattice energies, J. E. Mayer, R. B. Levy—647
Molecular rotation in crystals, J. C. Southard, R. T. Milner, S. B. Hendricks—95
Of $NaHCO_3$, W. H. Zachariasen—634
Rules regarding intermetallic alloys, H. Perlitz—335
Theory of structure of ice, J. D. Bernal, R. H. Fowler —515
Wüstite (FeO) solid solutions, E. R. Jette, F. Foote—29

Dielectric constant
Of $CHFCl_2$, CHF_2Cl, $CFCl_3$, CF_2Cl_2, C. P. Smyth, K. B. McAlpine—190
Drude method applied to KCl solutions, J. G. Malone, L. O. Case, A. L. Ferguson—842
Of gases, dependence on temperature and density, H. H. Uhlig, J. G. Kirkwood, F. G. Keyes—155
Of liquid S, H. J. Curtis—160
Methods and application to KCl solutions, J. G. Malone, A. L. Ferguson, L. O. Case—836
Of organic liquids, W. T. Szymanowski—809
Of some long chain compounds, C. P. Smyth, W. S. Walls—200

Dielectric properties
Of water and ice, J. D. Bernal, R. H. Fowler—515

Diffusion
In crystals, W. Jost—466
Of H_2 through Pt and Ni, W. R. Ham—476

Dipole moment (see Electric moment)

Dispersion
Rotatory dispersion curves of fatty acids, P. A. Levene, A. Rothen, R. E. Marker—662

Dispersion of sound
And the dissociation of N_2O_4, C. E. Teeter, Jr.—251; W. T. Richards, J. A. Reid—114, 737

Dissociation
Of carbon-carbon linkage, J. B. Conant—427
Of cyanogen, G. B. Kistiakowsky, H. Gershinowitz— 432; correction—885
Of ethylene iodide, thermal, L. B. Arnold, Jr., G. B. Kistiakowsky—166; errata—187
Of N_2O_4, C. E. Teeter, Jr.—251; W. T. Richards, J. A. Reid—114, 737
n-octane by electron impact, E. G. Linder—129
Of NaN_3, R. H. Müller, G. C. Brous—482

Electric moments
Of $CHFCl_2$, CHF_2Cl, $CFCl_3$, CF_2Cl_2, C. P. Smyth, K. B. McAlpine—190
And covalent bonds, J. G. Malone—197
Of HCl, I. Estermann, R. G. J. Fraser—390
Of long-chain molecules, C. P. Smyth, W. S. Walls—200
Of nitric oxide, C. P. Smyth, K. B. McAlpine—60
Of some mercaptans and sulfides, W. S. Walls, C. P Smyth—337

Electrical discharge
Decomposition and synthesis of organic compounds by, W. D. Harkins, J. M. Jackson—37

Electrolytes (see also Solutions)
In crystalline state, W. Jost—466
Determination of the mass of electrolytic ions, P. Debye—13
Interionic attraction theory, P. Van Rysselberghe—205

Electrolytic conduction in crystals, W. Jost—466

Electron diffraction
By CCl_4 and I_2 and the diiodobenzenes, S. B. Hendricks, R. L. Maxwell, V. L. Mosley, M. E. Jefferson—549
By cis and trans-dibromoethylene, tribromoethylene, vinyl bromide, tetrachlorethylene and trichlorethylene, R. W. Dornte—566
By methane derivatives, R. W. Dornte—630

Electrophoretic mobilities of protein-coated particles, O. Halpern—882

Energy
Exchange of, between molecules and metal surface, F. R. Whaley—186

Entropy
Of activation, V. K. La Mer—289
Of Br and HBr, A. G. Gordon, C. Barnes—692
Of calcium and barium sulfates, W. M. Latimer, J. F. G. Hicks, Jr., P. W. Schutz—620
Of CO, L. S. Kassel—576
Of silver sulfate, W. M. Latimer, J. F. G. Hicks, Jr., P. W. Schutz—424
Of solids, G. A. Linhart—795
Of the sulfate ion, W. M. Latimer, J. F. G. Hicks, Jr., P. W. Schutz—620

Errata
Decomposition of ethylene iodide, L. B. Arnold, Jr., G. B. Kistiakowsky—187
Thermal dissociation of C_2N_2, G. B. Kistiakowsky, H. Gershinowitz—885
Zeeman effect in solids, F. H. Spedding—287

Free energy
Of activation, V. K. La Mer—289
Of Br and HBr, A. R. Gordon, C. Barnes—692
Of CO, L. S. Kassel—576
Of H^1H^2, H^2H^2 and compounds containing the H^2 atom, H. C. Urey, D. Rittenberg—137
Of ozone, L. S. Kassel—414
Of steam and CO_2, A. R. Gordon—308
Of sulfate ion, W. M. Latimer, J. F. G. Hicks, Jr., P. W. Schutz—620

$GdCl_3 \cdot 6H_2O$
Zeeman effect in solid, F. H. Spedding—144; errata—287

Heat capacity
Of bromine and hydrogen bromide, A. R. Gordon, C. Barnes—692
Of calcium and barium sulfates, W. M. Latimer, J. F. G. Hicks, Jr., P. W. Schutz—620
Of CO, L. S. Kassel—576
Of silver sulfate, W. M. Latimer, J. F. G. Hicks, Jr., P. W. Schutz—424
Of solids, G. A. Linhart—795

Heat content
Of binary solutions, J. J. Coleman, F. E. E. Germann—847
Of CO, L. S. Kassel—576

Helium
Normal state of molecular ion, L. Pauling—56

Helium hydride ion, G. Glockler, D. L. Fuller—886(L)

Hydration of ions, J. D. Bernal, R. H. Fowler—515

Hydrogen
Dielectric constant of, H. H. Uhlig, J. G. Kirkwood, F. G. Keyes—155
Isotopes, biological effects, H. S. Taylor, W. W. Swingle, H. Eyring, A. A. Frost—751(L)
exchange reactions, R. H. Crist, G. A. Dalin—677(L)
names and symbols, H. C. Urey, G. M. Murphy, F. G. Brickwedde—512(L)
separation by electrolysis, D. H. Rank—750(L)
separation by electrolysis, H. S. Taylor, H. Eyring, A. A. Frost—823
separation of, H. Eyring, A. Sherman—345
separation of, E. W. Washburn, E. R. Smith—426(L)
separation of, G. N. Lewis, R. T. Macdonald—341
thermodynamic properties, H. C. Urey, D. Rittenberg—137
Molecular ion, B. N. Dickinson—317

Hydrogen molecule
Ground state of, H. M. James, A. S. Coolidge—825
Normal state of, S. Weinbaum—593

Ionization
Influence on ignition temperatures, B. Lewis, C. D. Kreutz—89

Isoelectric point of protein-coated particles, O. Halpern—882

Isotopes
Biological effects of H^2, H. S. Taylor, W. W. Swingle, H. Eyring, A. A. Frost—751(L)
Concentration of deuterium by electrolysis, D. H. Rank—750(L)
Exchange reactions of the hydrogen isotopes, R. H. Crist, G. A. Dalin—677(L)

Isotopes (Continued)
Fractionation of H_2O, E. W. Washburn, E. R. Smith, M. Frandsen—288
H_2, names and symbols, H. C. Urey, G. M. Murphy, F. G. Brickwedde—512(L)
H_2, separation by distillation and adsorption of H_2O, E. W. Washburn and E. R. Smith—426(L)
H_2, separation by electrolysis, H. S. Taylor, H. Eyring, A. A. Frost—823
H_2, separation of, G. N. Lewis, R. T. Macdonald—341
H_2, thermodynamic properties, H. C. Urey, D. Rittenberg—137
Separation of, H. Eyring, A. Sherman—345

Kinetics of reactions
Activation energies, G. K. Rollefson, J. C. Potts—400
Addition and subtraction reactions, L. S. Kassel—749(L)
And conjugate double bonds, H. Eyring, A. Sherman, G. E. Kimball—586
Decomposition of ethyl mercaptan and ethyl sulfide, N. R. Trenner, H. A. Taylor—77, 286; W. M. Malisoff, E. M. Marks—284
Decomposition of methyl and ethyl ether, E. W. R. Steacie—313
Dispersion of sound in N_2O_4 and its dissociation, W. T. Richards, J. A. Reid—114
Dissociation of N_2O_4 and the dispersion of sound, C. E. Teeter, Jr.—251
Dissociation of sodium azide, R. H. Müller, G. C. Brous—482
In electrodeless discharge, W. H. Rodebush, M. H. Wahl—696
Electron bombardment and ultraviolet light, R. H. Müller, G. C. Brous—482
Energy, entropy and free energy of activation, V. K. La Mer—289
H atoms with O_2, J. R. Bates—457
Hydrogen-carbon monoxide, J. R. Bates—457
Hydrogen-chlorine reaction, J. R. Bates—457
Hydrogen peroxide, photodissociation of, J. R. Bates—457
Of hydroxyl radical, W. H. Rodebush, M. H. Wahl—696
Ionization and the ignition temperatures of combustible gases, B. Lewis, C. D. Kreutz—89
Lifetimes of unstable molecules, N. Rosen—319
Mechanism of substitution reactions, A. R. Olson—418
Quantum theory of, O. K. Rice—625(L)
Relation to thermodynamics, W. H. Rodebush—440
Thermal decomposition of ethylene iodide, L. B. Arnold, Jr., G. B. Kistiakowsky—166, errata—187
Thermal decomposition of methyl ethyl ether, E. W. R. Steacie—618
Thermal decomposition of propyl mercaptan, H. A. Taylor, E. T. Layng—798
Thermal dissociation of C_2N_2, G. B. Kistiakowsky, H. Gershinowitz—432; correction—885

Lattice energy
Of cuprous halides, J. E. Mayer, R. B. Levy—647
Of silver and thallium halides, J. E. Mayer—327

Lifetimes of unstable molecules, N. Rosen—319

Magneto-optic apparatus (see Allison effect)

Mass defect, W. M. Latimer, W. F. Libby—133

Methane
Structure of, and related molecules, J. H. Van Vleck—177, 219

Molecular beams
Electric moment of HCl, I. Estermann, R. G. J. Fraser—390

Molecular spectra
Of N, H. S. Harned, E. R. Brownscombe—183
Of PN, J. Curry, L. Herzberg, G. Herzberg—749(L)

Molecular structure
From electron diffraction, R. W. Dornte—566

Monomolecular films
Contact potentials, W. D. Harkins, E. K. Fischer—852
Electrical properties, H. G. Yamins, W. A. Zisman—656
Oil lenses and films on H_2O, I. Langmuir—756

Nitrogen
Molecular spectrum, H. S. Harned, E. R. Brownscombe—183

Nuclear structure
Mass defect, W. M. Latimer, W. F. Libby—133

Packing fraction
Bond energies and mass defects, W. M. Latimer, W. F. Libby—133

Phase rule
For adsorption, I. Langmuir—3
Binary alloys of Si with Ag, Au, Pb, Sn, Zn, Cd, Sb, Bi, E. R. Jette, E. B. Gebert—753

Polarization
Atomic, C. P. Smyth—247
And dispersion in the alkali halides, J. E. Mayer—270
Complex formation due to, G. Glockler, D. L. Fuller, C. P. Roe—709
Complex formation due to, G. Glockler, C. P. Roe, D. L. Fuller—703

Predissociation
And the crossing of potential energy curves, O. K. Rice—375

Quantum mechanics (see also Valence)
Activation energies, G. K. Rollefson, J. C. Potts—400
Benzene, naphthalene and free radical bonds, L. Pauling, G. W. Wheland—362
Benzol molecule, M. Markov—784
Of crystalline binding forces in the alkali and alkaline earth metals, O. K. Rice—649
Of crystal nuclei, H. S. Taylor, H. Eyring, A. Sherman—68

Ground state of the H_2 molecule, H. M. James, A. S. Coolidge—825
Helium hydride ion, G. Glockler, D. L. Fuller—886(L)
Of Li and three electron ions, E. B. Wilson, Jr.—210
Of CH_4 and related molecules, J. H. Van Vleck—177, 219
Molecular He_2 ion, L. Pauling—56
Molecular H_2 ion, B. N. Dickinson—317
Molecular symmetry and reduction of the secular equation, H. Eyring, A. A. Frost, J. Turkevich—777
Predissociation and diffuse levels, O. K. Rice—375
Of seven and eight electrons, H. Eyring, G. E. Kimball —239
Virial and molecular structure, J. C. Slater—687

Radioactive substances
Atomic weights, F. Western, A. E. Ruark—717

Raman spectra
Of cyanogen halides, W. West, M. Farnsworth—402
Of dichlorobenzenes, J. W. Swaine, J. W. Murray—512(L)
Of mono-substituted benzene compounds, J. W. Murray, D. H. Andrews—406
Of tetramethylmethane, its monochloride and *n*-amyl chloride, D. H. Rank—572
Of H_2O vapor, D. H. Rank—504

Reaction kinetics (see **Kinetics of reactions**)

Refractive indices of $NaHCO_3$, W. H. Zachariasen—640

Rotatory dispersion of fatty acids, P. A. Levene, A. Rothen, R. E. Marker—662

Solutions (see also **Electrolytes**)
Derivation of equations for regular solutions, J. H. Hildebrand, S. E. Wood—817
Dielectric constants of KCl solutions, J. G. Malone, L. O. Case, A. L. Ferguson—842
Dielectric constants of KCl solutions, J. G. Malone, A. L. Ferguson, L. O. Case—836
Distribution of electrolytes between solid and liquid phases, A. P. Ratner—789
Heat of formation, J. J. Coleman, F. E. E. Germann—847
Heats of solution in H_2O, J. D. Bernal, R. H. Fowler—515
Interionic attraction theory, P. Van Rysselberghe—205
Mobilities of hydrogen and hydroxyl ions, J. D. Bernal, R. H. Fowler—515
Solid Wüstite (FeO), E. R. Jette, F. Foote—29
Thermodynamic properties of solid solutions, E. D. Eastman, R. T. Milner—444
Viscosities of H_2O solutions, J. D. Bernal, R. H. Fowler —515
Wüstite solid solutions, E. R. Jette, F. Foote—29

Spectra
Absorption, of ethyl halides, P. C. Cross, F. Daniels—48
of CN, G. B. Kistiakowsky, H. Gershinowitz—432; correction, 885
of NO_2, N_2O_4, R. Schaffert—507

Spectra, molecular
Calculation of thermodynamic properties from, A. R. Gordon, C. Barnes—297
Predissociation and diffuse levels, O. K. Rice—375

Statistical mechanics
Of intermolecular forces, J. G. Kirkwood—597

Sulfur
Dielectric constant of liquid, H. J. Curtis—160

Supersonic waves
Determination of the mass of electrolytic ions by, P. Debye—13

Surface phenomena (see also **Colloidal phenomena**)
Contact potentials and unimolecular films of acids and alcohols, W. D. Harkins, E. K. Fischer—852
Deduction of Gibbs' adsorption isotherm, F. O. Koenig, R. C. Swain—723
Electrical properties of monomolecular films, H. G. Yamins, W. A. Zisman—656
Oil lenses and monomolecular films, I. Langmuir—756

Symmetry of the benzene molecule, V. Deitz, D. H. Andrews—62

Thermodynamic properties
Of Br and HBr, A. R. Gordon, C. Barnes—692
Of CO, L. S. Kassel—576
Entropy of crystalline solutions, E. D. Eastman, R. T. Milner—444
Free energy of ozone, L. S. Kassel—414
Free energy of steam and CO_2, A. R. Gordon—308
Heat capacity and entropy of silver sulfate, W. M. Latimer, J. F. G. Hicks, Jr., P. W. Schutz—424
Heat of expansion of a gas of varying mass, L. J. Gillespie, J. R. Coe, Jr.—103
Of H^1H^2, H^2H^2 and compounds containing the H^2 atom, H. C. Urey, D. Rittenberg—137
Low temperature specific heats, J. C. Southard, R. T. Milner, S. B. Hendricks—95
Method of calculation of, A. R. Gordon, C. Barnes—297
Methods of calculating from spectroscopic data, L. S. Kassel—576
New kind of transition points, O. Halpern—880
Pressure temperature composition relations for HCl–Kr and HCl–C_3H_8, G. Glockler, D. L. Fuller, C. P. Roe —714
Pressure-volume relations for propane and HCl, G. Glockler, D. L. Fuller, C. P. Roe—709
Pressure-volume relations for Kr and HCl, G. Glockler, C. P. Roe, D. L. Fuller—703
Of Ag and Tl halides, J. E. Mayer—327
Of solutions, J. H. Hildebrand, S. E. Wood—817

Thermodynamics
Third law of, E. D. Eastman, R. T. Milner—444

Transition points
Theory of a new kind of, O. Halpern—880

Valence (see also Quantum mechanics)
In benzene, naphthalene and free radicals, L. Pauling, G. W. Wheland—362
Binding energies in crystal nuclei, H. S. Taylor, H. Eyring, A. Sherman—68
Bond directions in the diiodobenzenes, S. B. Hendricks, L. R. Maxwell, V. L. Mosley, M. E. Jefferson—549
Bond moments, C. P. Smyth, K. B. McAlpine—190
Calculation of matrix elements, H. Eyring, G. E. Kimball—626(L)
Chemical bond, G. N. Lewis—17
Of conjugate double bonds, H. Eyring, A. Sherman, G. E. Kimball—586
And electric moments, J. G. Malone—197
And electronic structures of polyatomic molecules, R. S. Mulliken—492
Ground state of H_2, H. M. James, A. S. Coolidge—825
Heat of dissociation of C-C linkage, J. B. Conant—427
Helium hydride ion, G. Glockler, D. L. Fuller—886(L)
Hydrogen molecule, S. Weinbaum—593
Keto-enol systems, G. W. Wheland—731
Lewis electronic structures, L. Pauling—280
Of Li and three-electron ions, E. G. Wilson, Jr.—210
Normal state of the He_2 molecule ion, L. Pauling—56
Normal state of the H_2 molecule ion, B. N. Dickinson —317
Resonance energy in conjugated systems, L. Pauling, J. Sherman—679
Resonance energy in organic molecules, L. Pauling, J. Sherman—606
Structure of CH_4 and related molecules, J. H. Van Vleck—177, 219
Theory of 7 and 8 electrons, H. Eyring, G. E. Kimball Vi—239
brations of three particle systems, P. C. Cross, J. H. Van Vleck—350

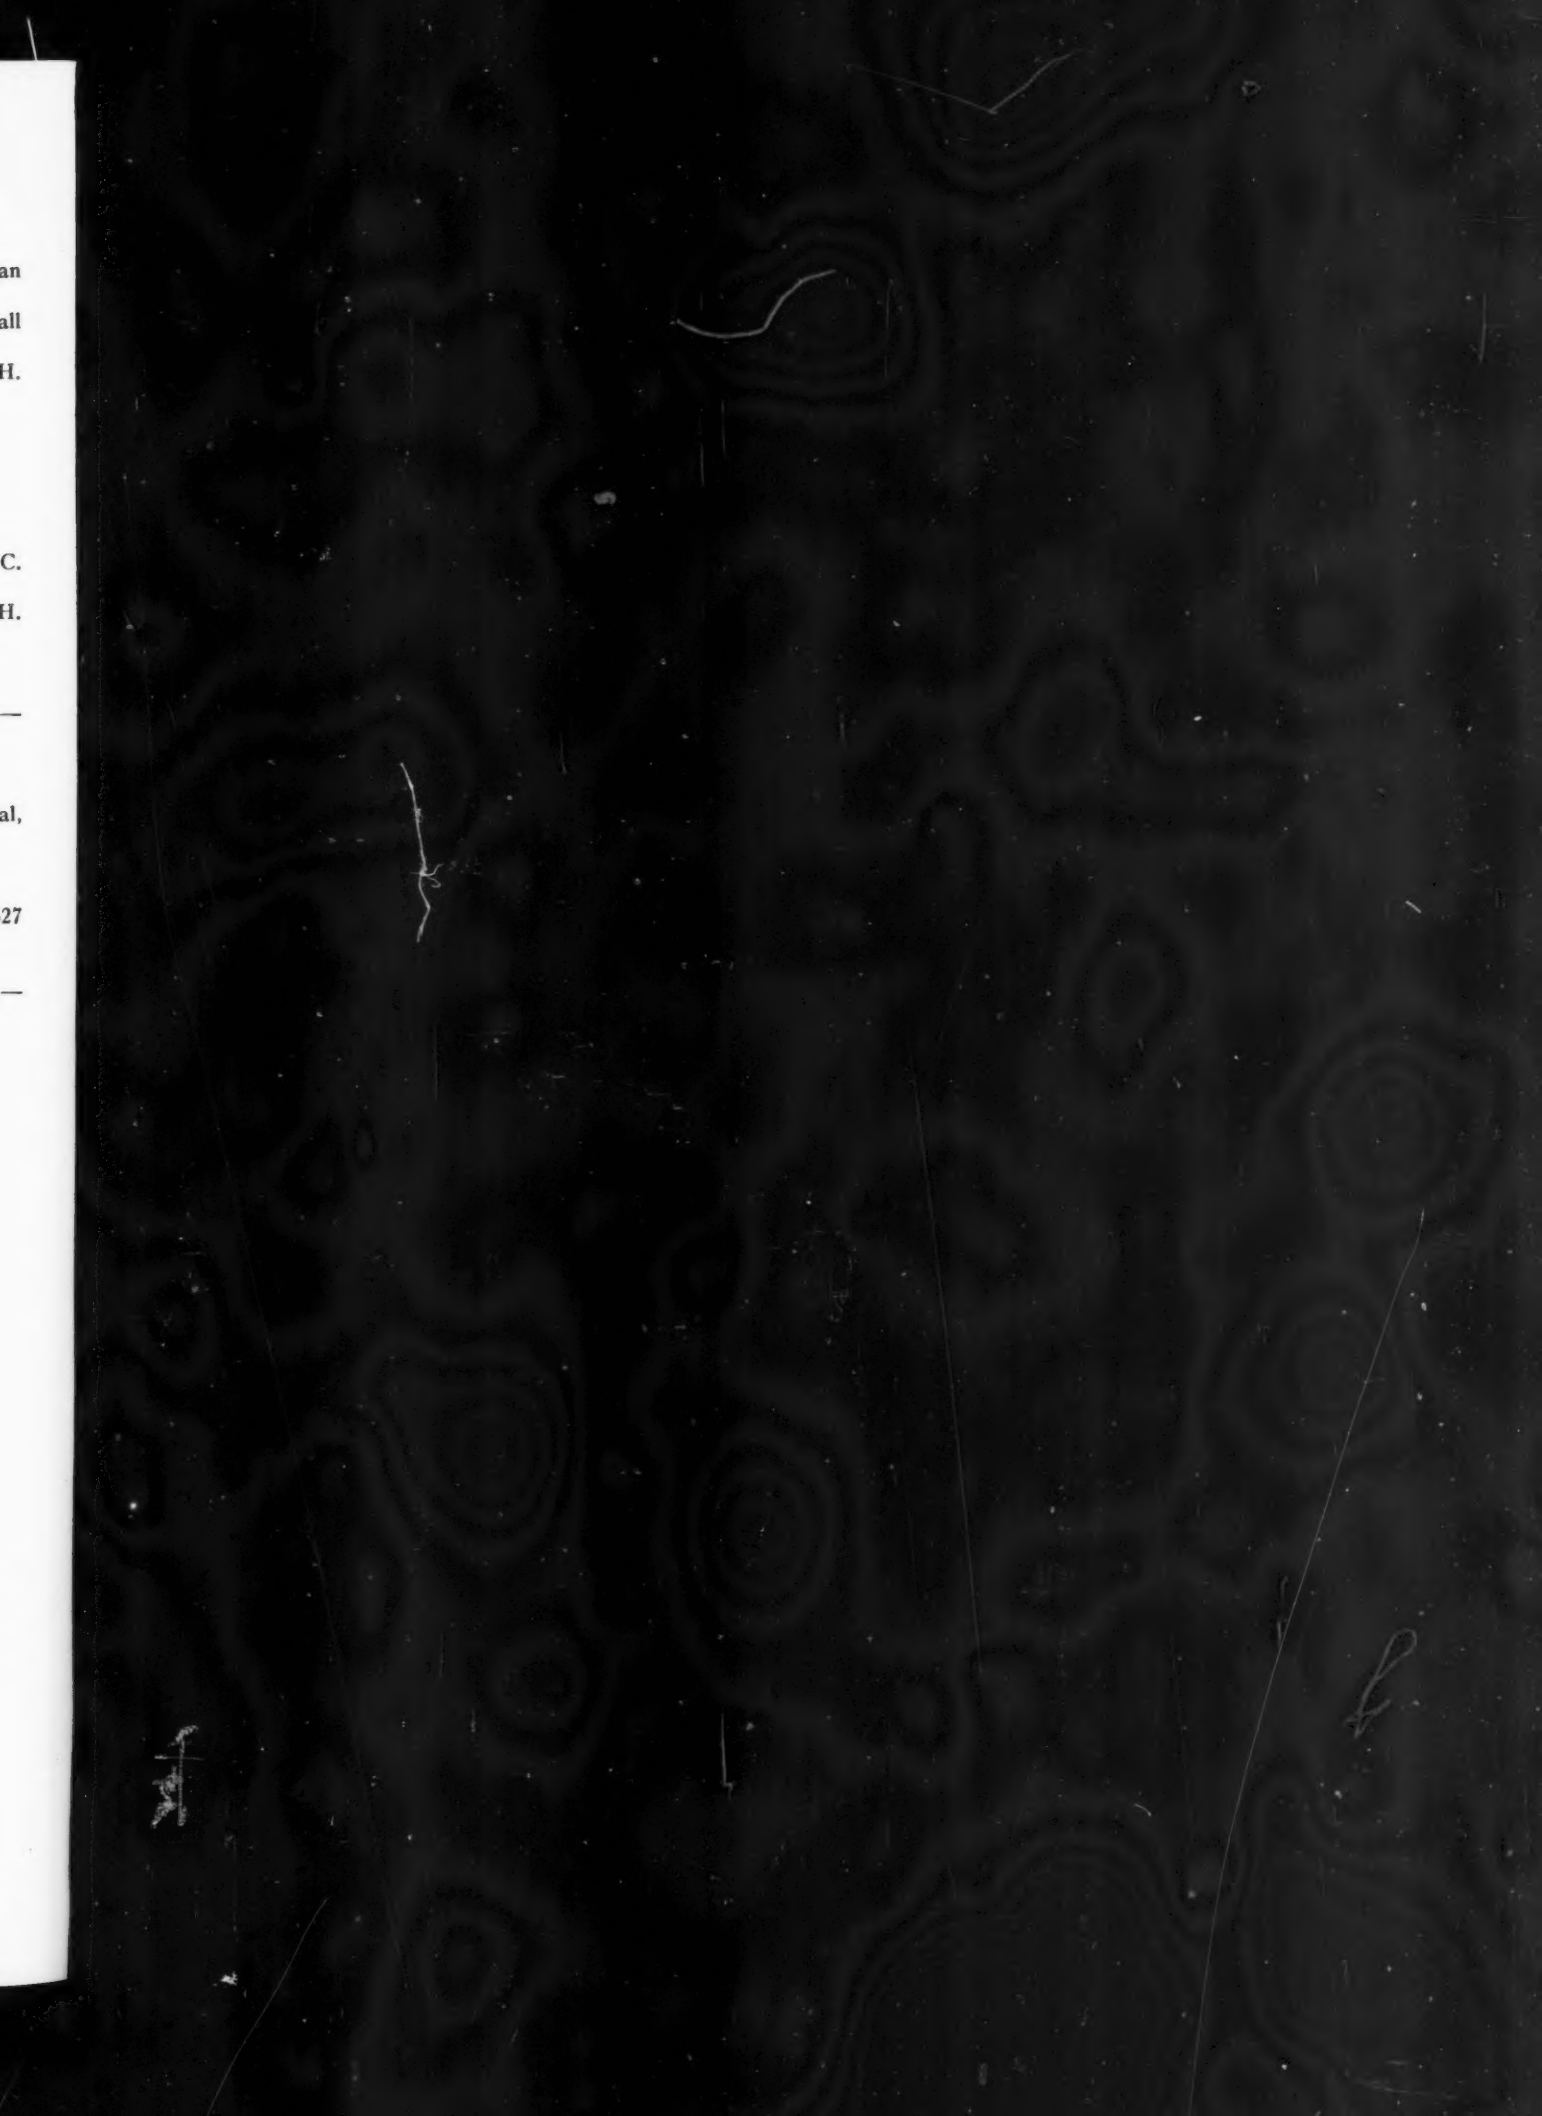
van der Waals potential, J. E. Mayer—270

Velocity of reactions (see Kinetics of reactions)

Vibrations
Normal, of the H_2O molecule, J. H. Van Vleck, P. C. Cross—357
Normal, in 3 particle systems, P. C. Cross and J. H. Van Vleck—350

Viscosity
Of vapors and the Sutherland equation, J. H. Arnold—170

Water
Theory of H_2O and its ionic solutions, J. D. Bernal, R. H. Fowler—515

X-rays
Solarization of glass by, H. Kersten, C. H. Dwight—627


Zeeman effect
In solid $GdCl_3 \cdot 6H_2O$, F. H. Spedding—144; erratum—287
